SUMMARY

Motivated and detail-oriented aspiring Full Stack Developer with hands-on experience building scalable MERN applications. Passionate about creating efficient, user-centric solutions and continuously improving problem-solving skills through real-world projects and system design. Eager to contribute to impactful products while growing as a developer.

EDUCATION

•Bachelor of Science in Data Science and Applications

2026-Ongoing

Indian Institute of Technology, Madras

•Diploma in Programming

2024-2026

Indian Institute of Technology, Madras

PERSONAL PROJECTS

•Covalent Sales (Customer Relationship Management) [github](#)

MERN-based CRM platform with JWT authentication, lead management, and sales analytics dashboard

Sep – Nov 2025

- Developed a scalable MERN-based CRM platform with a responsive Bootstrap UI.
- Implemented JWT-based authentication and secure password hashing using bcrypt.
- Built multi-level sorting and filtering for leads (status, agent, priority, close time).
- Integrated real-time analytics dashboards using Recharts for performance tracking.
- Designed RESTful APIs with modular architecture, improving maintainability and scalability.
- Built an agent comment system with timestamps and toast notifications for real-time updates.
- Optimized API calls and state management, reducing redundant requests and improving performance.

•DigiMart (E-commerce) [github](#)

Responsive e-commerce app with personalization, cart, seamless checkout

Jun – Aug 2025

- Built a responsive e-commerce web app using React and Bootstrap.
- Implemented product filtering, sorting, and recommendation features for personalization.
- Developed dynamic cart and wishlist using Context API.
- Designed secure address handling and seamless checkout flow.
- Created mobile-first UI components for better UX across devices.
- Integrated with Express.js backend for efficient API communication.

EXPERIENCE

•Software Engineer Intern

Jan 2026 - Mar 2026

Shaurya Software Pvt. Ltd., Zirakpur

On-site

- Developed and maintained scalable frontend modules for a School ERP system using **Next.js** and **TypeScript**.
- Designed responsive and modern UI using **Tailwind CSS** and **Shadcn**, ensuring consistency across the application.
- Built reusable and modular components, improving development speed and maintainability.
- Collaborated with backend teams for seamless API integration and efficient data handling.
- Enhanced user experience by optimizing dashboards, forms, and data rendering performance.

•Video Editor

Jun 2024 – Aug 2025

English Connection, Panchkula

On-site

- Created and edited engaging YouTube videos with strong visual storytelling and quality.
- Collaborated on content planning to improve audience engagement and consistency.
- Enhanced video output using editing tools, optimizing flow, transitions, and presentation.
